

ASVAB ASSEMBLING OBJECTS PRACTICE TEST

15 QUESTIONS TO BE ANSWERED IN 40 MINUTES

Assemble the following object:

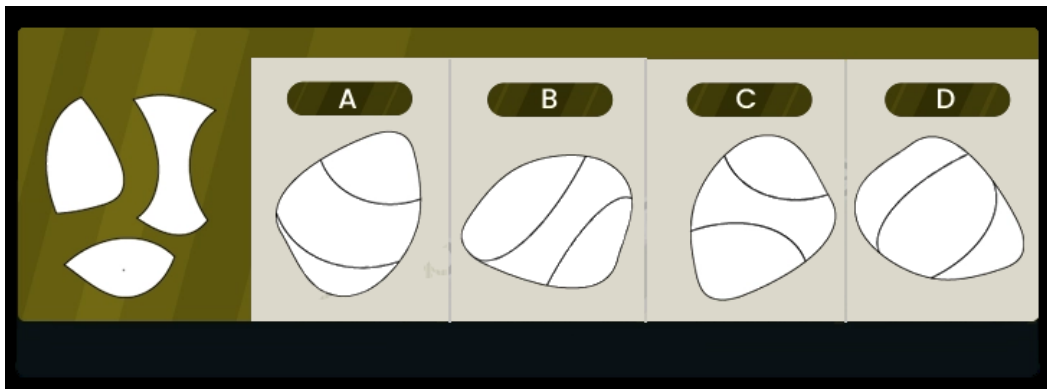

1.

A
B
C
D

Assemble the following object:

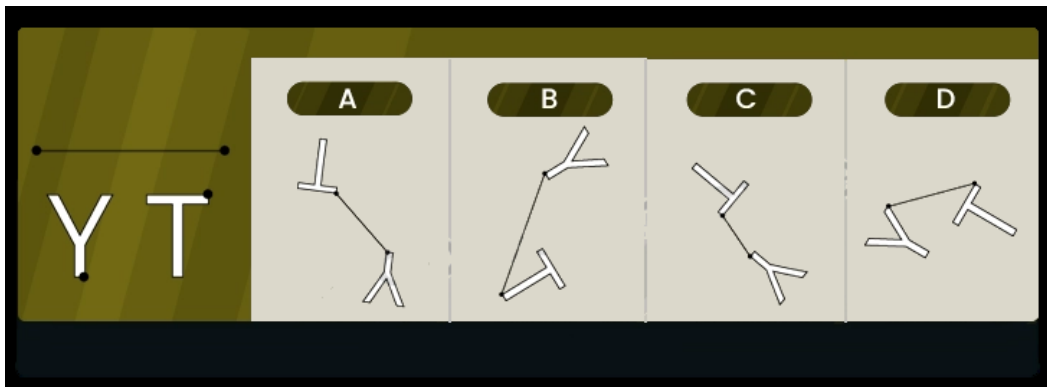

2.

- A
- B
- C
- D

Assemble the following object:

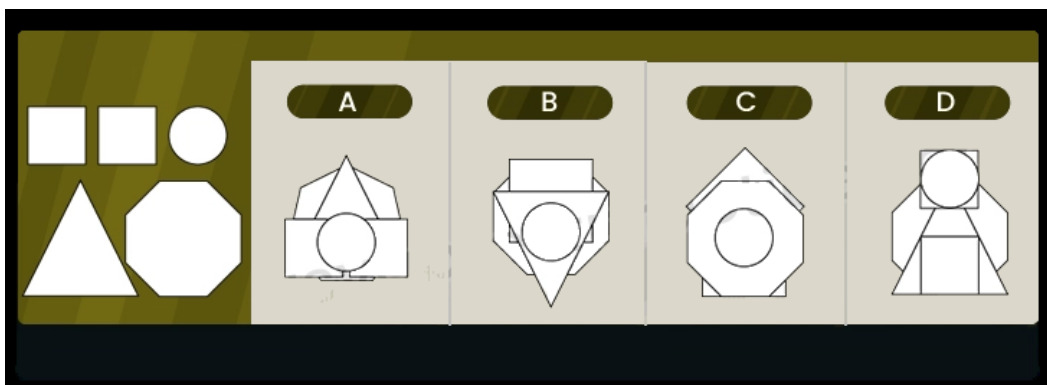

3.

- A
- B
- C
- D

Assemble the following object:

4.

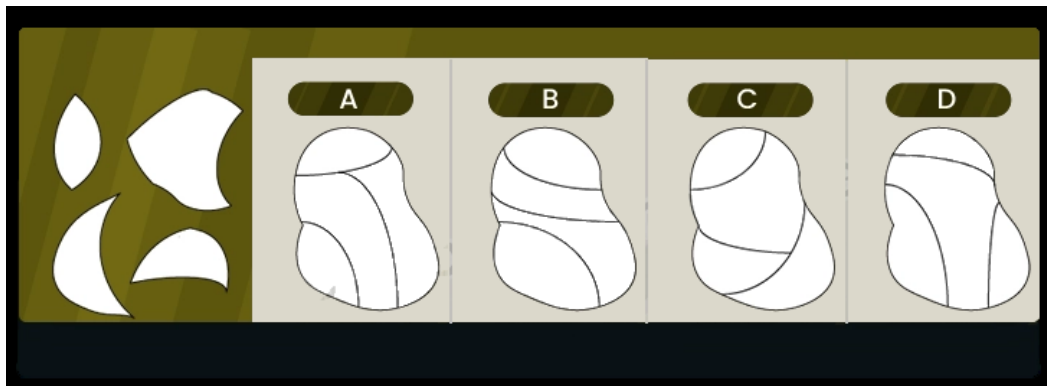

- A
- B

C
D

Assemble the following object:

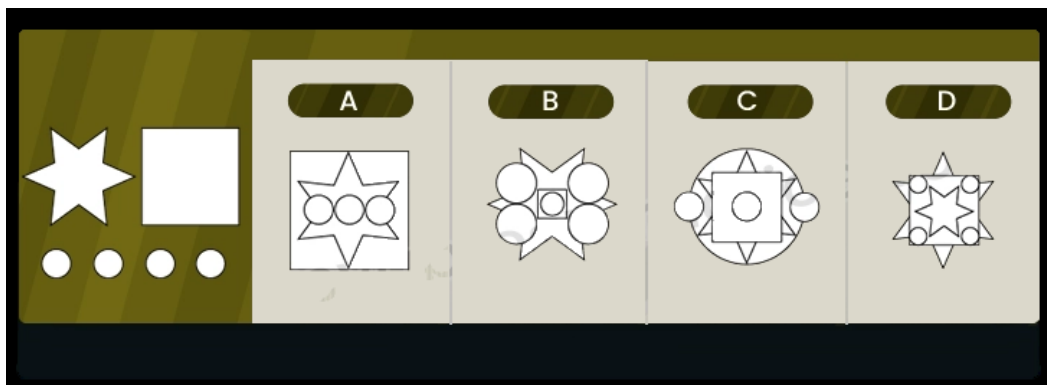

5.

A
B
C
D

Assemble the following object:

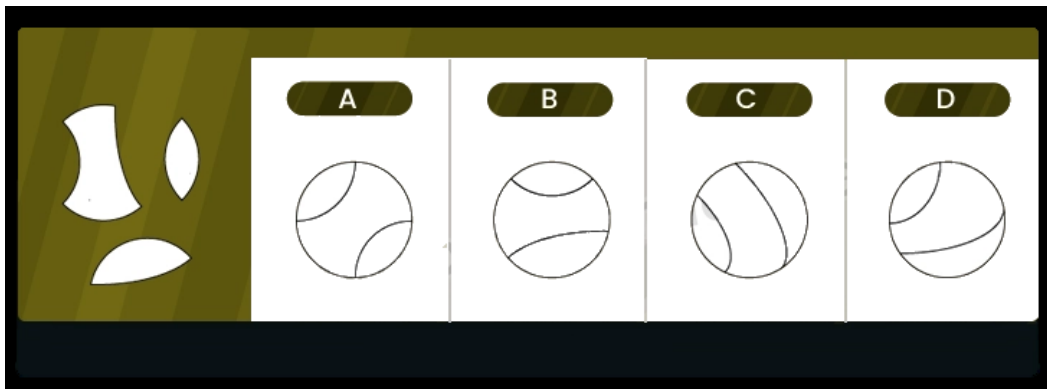

6.

A
B
C
D

Assemble the following object:

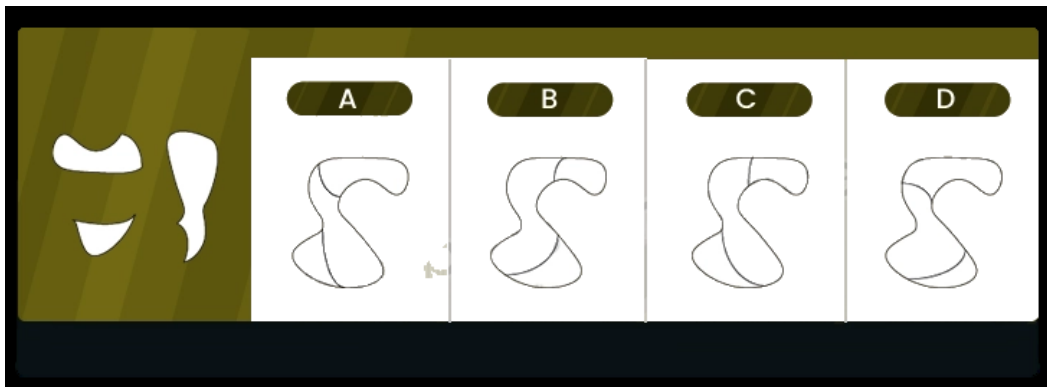

7.

- A
- B
- C
- D

Assemble the following object:

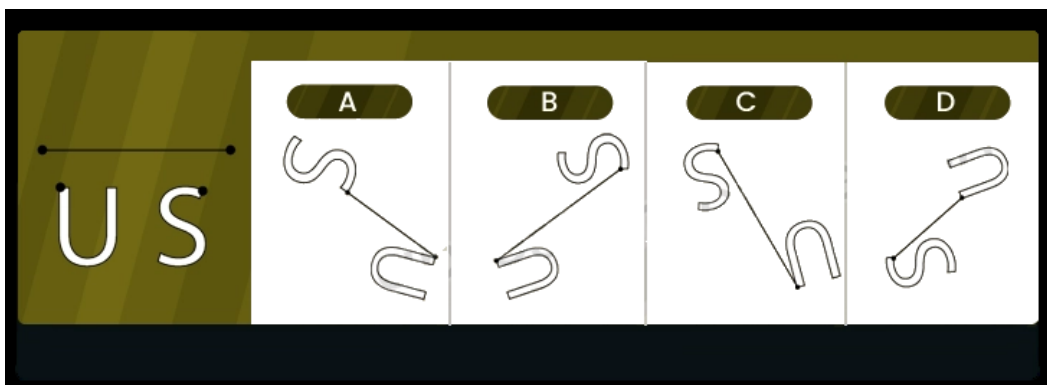

8.

- A
- B
- C
- D

Assemble the following object:

9.

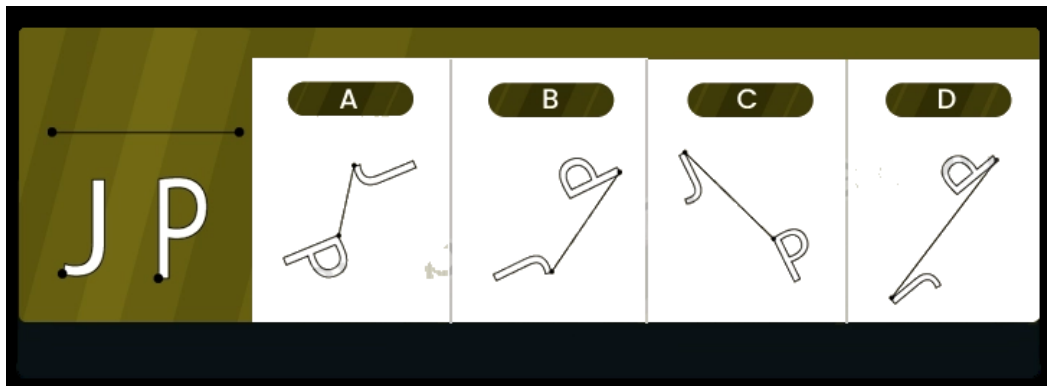

- A
- B

C
D

Assemble the following object:

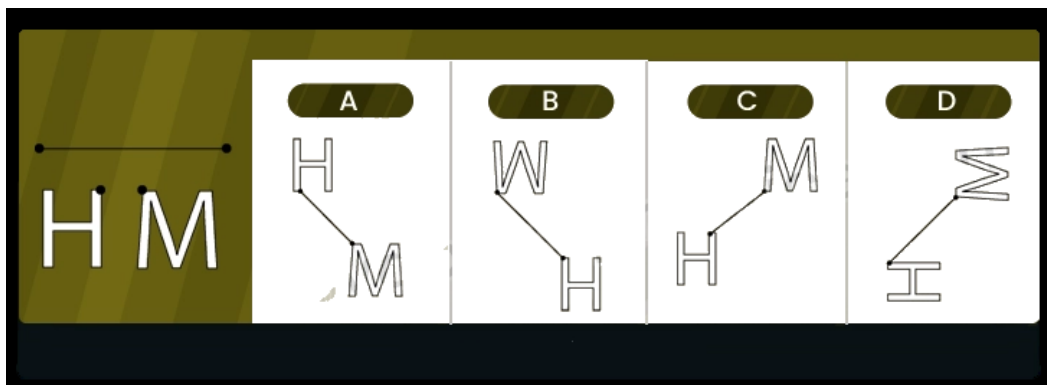

10.

A
B
C
D

Assemble the following object:

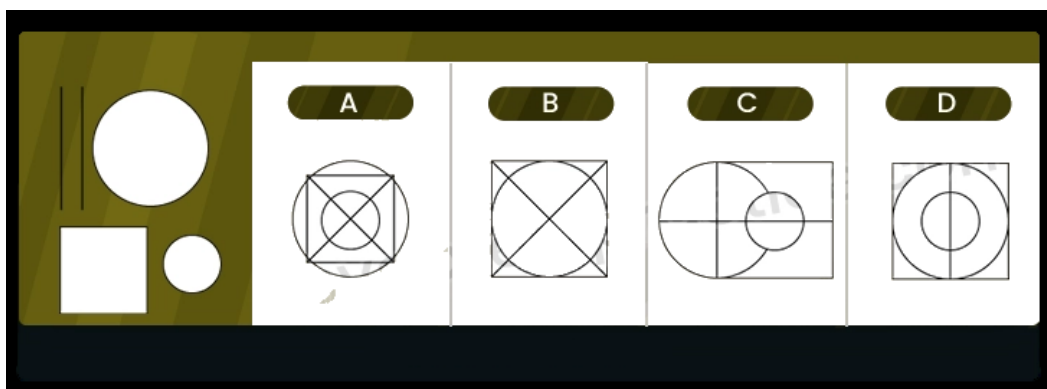

11.

A
B
C
D

Assemble the following object:

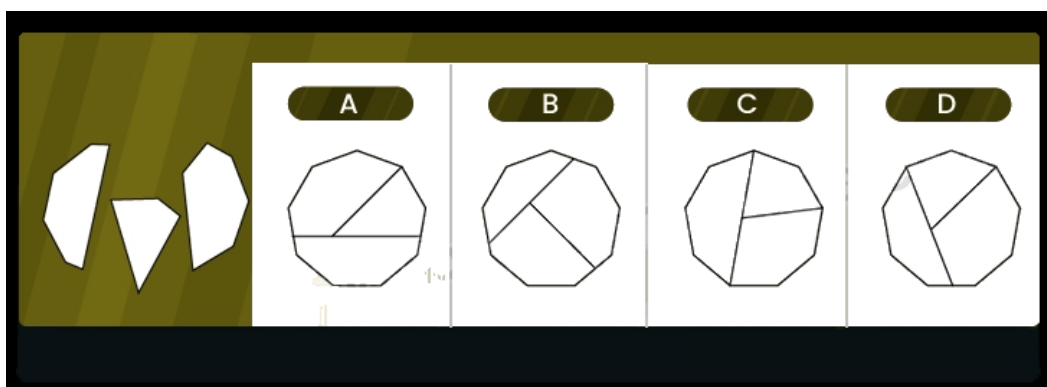

12.

- A
- B
- C
- D

Assemble the following object:

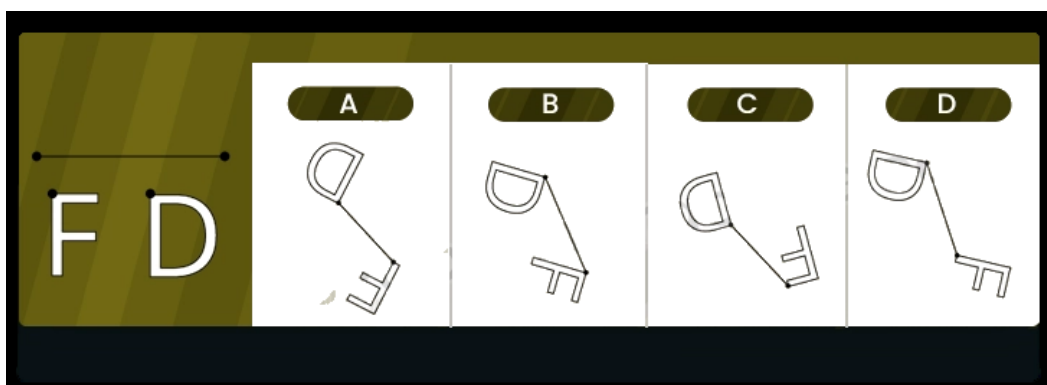

13.

- A
- B
- C
- D

Assemble the following object:

14.

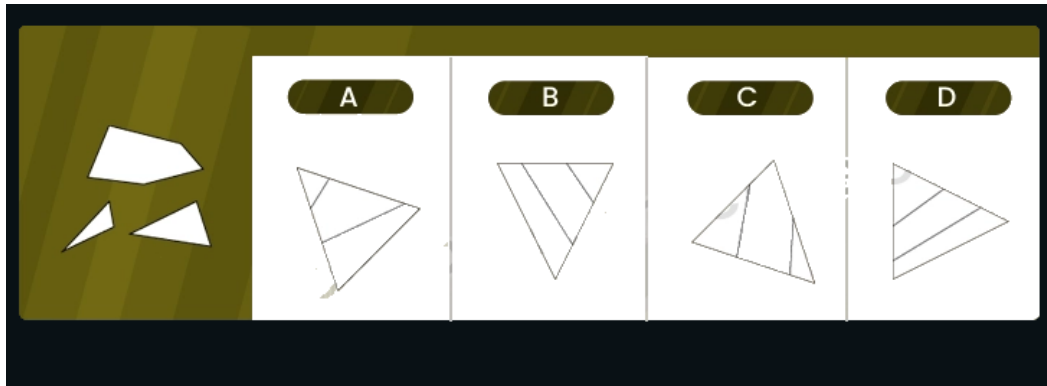

- A
- B

C
D

Assemble the following object:

15.

A
B
C
D

Answers

1. C

The correct answer is C.

Both 'W' and 'I' in the question are rotated about 110° to the right and can be observed only in Answer C.

Also, the bottom-right-inside corner of 'W' directly links to the top-right corner of 'I'.

2. C

The correct answer is shape C.

The top-left piece in the question pairs the equivalent bottom shape in Answer C only rotated about 90° to the right.

The top-right wedge is located in the middle, rotated 90° to the left.

The bottom piece is rotated roughly 180° and fits at the top of the shape.

3. C

The correct answer is C.

Both 'Y' and 'T' in the question are rotated about 135° to the right and can be spotted only in Answer C.

Also, the bottom-right corner of 'Y' directly connects to the top-right of 'T'.

4. D

The correct answer is D.

All five shapes in the question are only present in Answer D.

Answer A contains a hexagon instead of an octagon, Answer B is missing a second square and Answer C is missing a triangle.

5. C

The correct answer is shape C.

The top-left oval segment in the question matches the top-left portion of Answer C only, rotated about 130° to the right.

The top-right segment is placed in the upper-middle of the shape, rotated about 135° to the left.

The bottom-left wedge segment is rotated roughly 130° to the left and is positioned at the bottom-right of the shape.

The bottom-right segment is rotated roughly 170° to the left and is positioned at the lower-middle of the shape.

6. C

The correct answer is C.

All six shapes in the question are only present in Answer C.

Answer A is missing the fourth circle, Answer B has an additional fifth circle and Answer D has an additional second star.

7. B

The correct answer is shape B.

The top-left segment in the question matches the same middle shape in Answer B only, rotated about 90° to the right.

The top-right wedge is placed on top, rotated 90° to the right.

The bottom piece is rotated approximately 180° and fits at the bottom of the circle.

8. A

The correct answer is shape A.

The top-right segment in the question matches the top shape in Answer A only, rotated about 180° .

The bottom-left part in the question is situated on the bottom-left side of the shape, rotated about 90° to the right.

The right segment is rotated roughly 180° and is positioned at the centre of the shape.

9. A

The correct answer is A.

Both 'U' and 'S' in the question are rotated about 120° to the right and can be identified only in Answer A.

Also, the top-left corner of 'U' directly connects to the top-right of 'S'.

10. B

The correct answer is B.

Both 'J' and 'P' in the question are rotated about 115° to the left and can be noticed only in Answer B.

Also, the bottom-left corner of 'J' directly attaches to the bottom-left corner of 'P'.

11. D

The correct answer is D.

Both 'H' and 'M' in the question are rotated about 90 degrees to the left and can be seen only in Answer D.

Also, the top-right corner of 'H' directly connects to the top-left of 'M'.

12. A

The correct answer is A.

All five shapes in the question are only present in Answer A.

Answer B is missing a second circle, Answer C is missing a second straight line and Answer D is also missing a second straight line.

13. A

The correct answer is shape A.

The left segment in the question matches the bottom part of Answer A only, rotated about 100° to the left.

The middle segment is placed on the top-right side of the shape, rotated about 60° to the right.

The right segment is rotated roughly 130° to the left and is positioned at the top-left of the shape.

14. B

The correct answer is B.

Both 'F' and 'D' in the question are rotated about 110° to the right and can be found in Answer B.

Also, the top-left corner of 'F' directly connects to the top-left corner of 'D'.

15. C

The correct answer is shape C.

The top fragment in the question equally matches the middle part of the shape in Answer C only, rotated about 90° to the left.

The bottom-left triangle is placed on the right side of the shape, rotated about 120° to the right.

The bottom-right triangle is rotated roughly 125° to the right and fits at the left side of the shape.
